

x_make_py_mod_sideload_x â€™ Production Ledger

I log every notable change to this sideload protocol here. Entries follow [Keep a Changelog](#) and Semantic Versioning so covert imports remain fully accountable.

[0.20.4] - 2025-10-15

Changed

- README and control notes updated for the Road to 0.20.4 campaign, highlighting how sideload manifests now feed the expanded Kanban evidence trail.
- Reinforced guidance for tagging sideload runs with JSON artifacts so Static Gauntlet and Environment Provisioning columns inherit the data automatically.

[0.20.3] - 2025-10-14

Changed

- Updated README and control notes to reflect the Road to 0.20.3 JSON ledger alignment for sideload manifests.

[0.20.2] - 2025-10-14

Changed

- Refined documentation for the Road to 0.20.2 rollout, emphasizing the current sideload procedures and control-room expectations.

[0.20.1] - 2025-10-13

Changed

- Realigned README links and narrative to the Road to 0.20.1 control-room ledger so every sideload cook follows the sanctioned playbook.

[0.20.0-prep] - 2025-10-12

Added

- Established control-room themed documentation aligning sideload operations with the Road to 0.20.0 strategy.
- Linked sideload tooling to shared utilities, compliance checks, and the change-control ledger.

Changed

- Clarified the expectation that every sideload scenario documents source, safety checks, and rollback within the Change Control index.
